Good afternoon,

Please see the following comments made at last night’s Planning Committee –

‘MM14 – the rewording of policy DM9 on Green Infrastructure linkages should not state that the loss of ‘some trees and hedgerows or other existing green infrastructure is unavoidable’ as it sounds like NFDC don’t value their importance, so gives false impression.

MM74 – We are concerned about the use of the words ‘where possible’ when rewording NMT4 land east of Caird Avenue, South of Carrick Way, as it lessens the importance of keeping trees, protected or not, on development sites. Relocation of the minerals processing infrastructure should take place at commencement of the build and not the occupation stage of newly built housing, to protect the amenity of the new residents.

MM76 – We find it very disappointing that the Primary shopping area was not extended to include shops of Old Milton Road, but glad that there are some additions.’

On making these comments, we do not consider the plan unsound.

Regards

Theresa Elliott
