

Appendix Two

Useful web sites and information

UK Sustainable Drainage Guidance and Tools

- i) A very useful web site for assisting with the calculations and carrying out checks. It includes evaluation for SuDS, greenfield runoff rates, infiltration rates, water quality, rainwater harvesting tank sizing and other information.
Website is:-
http://geoservergisweb2.hrwallingford.co.uk/uksd/greenfieldrunoff_js.htm

BRE 365

- ii) This is required for guidance on the infiltration testing method and soakaway design. It is available from BREbookshop.co. Website is:-
<http://www.brebookshop.com/details.jsp?id=844>

CIRIA Sustainable Urban Drainage System manual C753

- iii) A very useful manual covering all forms of Sustainable Urban Drainage Systems. Registration at the website may be required.
http://www.ciria.org/Memberships/The_SuDs_Manual_C753_Chapters.aspx

Planning Practice Guidance - Flood Zone and Flood Risk Tables

- iv) Flood Zones information on a government website.
<http://planningguidance.communities.gov.uk/blog/guidance/flood-risk-and-coastal-change/flood-zone-and-flood-risk-tables/>

Building Control Part H – Drainage and Waste Disposal

- v) https://www.planningportal.co.uk/info/200135/approved_documents/71/part_h_-_drainage_and_waste_disposal

Susdrain - The community for sustainable drainage

<http://www.susdrain.org/>
